PROFESSIONAL SUMMARY

I am a motivated Computer Science graduate with hands-on experience in building real-world software solutions and supporting end-to-end project workflows. I bring a strong problem-solving mindset with a focus on clarity, structured thinking, and user-centered development. Known for fast learning, effective communication, and the ability to collaborate seamlessly within dynamic engineering teams. Experienced in handling responsibilities across planning, documentation, coordination, and development support, ensuring smooth execution throughout the project lifecycle. Committed to continuous learning and delivering reliable, thoughtful contributions in software engineering roles.

TECHNICAL SKILLS

Programming: Python, JavaScript (Basics), SQL

Web Technologies: HTML, CSS, React.js (Basic), Node.js (Basic), FastAPI

Cloud & DevOps: AWS (ECS Fargate, API Gateway, S3, SES), Docker, CI/CD Pipelines

AI & Automation: Prompt Engineering, LLM Workflows, Agentic AI Automation

Data & Visualization: Grafana, Open Telemetry, Power BI, Dashboard Development, Data Visualization

Tools & Platforms: Git, Twilio API, LiveKit

Core Concepts: REST APIs, Problem Solving, Team Collaboration, Documentation

EXPERIENCE

AI & Data Engineer — Lakhi Information Technologies

(July 2025 – Present)

- Developed and deployed containerized applications using Docker and AWS ECS Fargate, enabling scalable, cloud-native execution and streamlined deployment workflows.
- Built and enhanced frontend application features through reusable UI components, improving maintainability, user experience, and development efficiency.
- Developed and orchestrated AI agents and multi-agent workflows for task automation, contextual decision-making, and intelligent process execution.
- Integrated real-time communication features using LiveKit and supported WhatsApp automation workflows through Twilio APIs.
- Collaborated with cross-functional teams on development, testing, documentation, and deployment activities across the project lifecycle.
- Supported cloud-based application deployment and troubleshooting in agile development environments.

PROJECTS

GardenOS AI – AI-Powered Smart Gardening Platform

- Developed a full-stack gardening platform using Next.js, FastAPI, PostgreSQL, and Docker for plant management, task scheduling, reminders, and garden journaling.
- Built an AI-powered gardening assistant (Sprout) with RAG-based knowledge retrieval, contextual plant-history analysis, and season-aware recommendations for plant care and troubleshooting.

- Designed an interactive calendar-driven dashboard featuring CRUD operations, smart reminders, seasonal insights, and personalized gardening guidance to enhance user engagement and decision-making.

Campus AI – Student Assistant Platform

- Designed and developed a Python-based AI assistant to provide real-time information about campus events and clubs.
- Integrated user authentication and club-specific dashboards to enhance student engagement and experience.
- Implemented adaptive learning features to improve AI responses based on user interactions and organizer updates.

Stock Market Prediction (LSTM)

- Developed a machine learning model for stock price trend prediction using LSTM networks.
- Leveraged Long Short-Term Memory (LSTM) models to analyze historical stock data and predict price movements.
- Enabled profitable trade and improved investment strategies with AI-driven forecasting.

EDUCATION

B. Tech in Computer Science Engineering

CGPA: 7.7

Sreenidhi Institute of Science and Technology

CERTIFICATIONS

- Google Data Analytics Professional Certificate
- Accenture Data Analytics & Visualization (Forage)
- AWS AI-ML Virtual Internship
- Google AI-ML Virtual Internship

ACHIEVEMENTS

Vice President, The Arts Club

- Led cultural club operations, coordinated stakeholders, and organized major college events.
- Strengthened team collaboration and ensured smooth execution through strong leadership and communication.
